## Statement on greenhouse gas emissions according to the Carbon Border Adjustment Mechanism (CBAM) of the European Union

Dear Madam,  
Dear Sir,

Within the framework of the European Green Deal, the greenhouse gas emissions are strictly monitored with the aim of limiting CO<sub>2</sub> emissions. Efforts are focused on preventing that CO<sub>2</sub> emissions are shifted outside the EU, for example by placing orders to non-EU countries where regulations are not that strict, which is commonly referred to as carbon leakage. For this purpose the Carbon Border Adjustment Mechanism (CBAM) has entered into force on October 1, 2023.

We at Mankenberg have conducted an initial impact analysis and have identified that Mankenberg procures all of its materials/semi-finished products covered by this regulation (for example steel and steel parts) through suppliers from within the EU. In addition, we request extensive supplier self-disclosures at regular intervals and also carry out random audits at the suppliers' premises. Therefore, this law does not affect us in a first approach.

Mankenberg GmbH is a leading manufacturer of self-acting industrial valves located in Lübeck/Germany, where the entire manufacturing process from development to final inspection takes place. The vertical range of manufacture is > 90%. With our certifications according to DIN EN ISO 9001, DIN EN ISO 14001, DIN ISO 45001 and DIN EN ISO 3834-2, we meet all quality requirements with regard to our products and services, environmental protection as well as health and safety at work. We work continuously to fulfill our corporate responsibility for economically, socially and ecologically sustainable development and to consistently implement our sustainability goals.

For any further question on this subject, please do not hesitate to contact our quality department at [qualitaetswesen@mankenberg.de](mailto:qualitaetswesen@mankenberg.de)

Best regards

**Mankenberg GmbH**

Dr. Stefan Nehlsen
